DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 8, 12 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not disclose how to determine chip delay of ToSector, how to determine the chip delay of earliest arriving multipath sector and how to determine the maximum window size. It cannot be determined from the specification how to set maximum FromSector window size = the window size of FromSector. Furthermore, the definition of maximum window size is not clear and concise. Review of the specification did not yield answers to these uncertainties due to the specification containing the same language as presented in the claims. The specification does not teach clearly the limitations noted above so that one skilled in the art can evaluate these values. Please make appropriate changes.

Allowable Subject Matter

3. Claim 8, 12, and 16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action.

Response to Arguments

4. Applicant's arguments filed 5/17/2004 have been fully considered but they are not persuasive.

Applicant argues Examiner's 35 U.S.C. 112, first and second paragraph rejections. Applicant's arguments regarding 35 U.S.C. 112, second paragraph rejection are persuasive and Examiner withdraws rejection. However, Examiner contends 35 U.S.C. 112, first paragraph rejection is proper due to lack of presentation of supporting documents to show features of claims which were expressed by Applicant to be known by persons having ordinary skill in the art. The specific features are determination of chip delay of ToSector, chip delay of earliest arriving multipath sector, and determination of maximum window size. It is deemed by the Office that without further explanation or detail, the invention claimed cannot be made and used without undue further experimentation. Therefore, rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2666

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
